

Table of Contents

Foreword	i
About This Guide	iii
Table of Contents.....	v
List of Tables.....	vi
List of Figures.....	vii
List of Acronyms and Abbreviations.....	viii
Chapter 1: Basic Concepts of Local Watershed Planning.....	1
A. Benefits of Watershed Planning.....	1
B. The Geographic Scale of Watershed Planning.....	2
C. Watershed Planning Terminology.....	6
D. The Watershed Planning Process	8
E. Guidance for First Time Watershed Planning Efforts or Small Local Governments	12
F. Principles of Watershed Planning in Maryland	13
G. How to Use this Guide	15
Chapter 2: The Context for Watershed Planning in the State of Maryland	19
A. Maryland's Watersheds	20
B. Watershed Planning Drivers	23
B. Watershed Planning Drivers	24
C. Additional Watershed Planning Resources.....	34
Chapter 3: Getting Started	45
A. Organize the Core Team	45
B. Develop a Watershed-Based GIS.....	46
C. Gather Existing Watershed Data	48
D. Delineate Subwatershed Boundaries.....	49
E. Develop Initial Goals.....	52
F. Develop a Realistic Scope for a Watershed Plan.....	52
G. Develop an Overall Stakeholder Involvement Strategy	55
Chapter 4: Desktop Assessment Methods.....	57
A. Identify Watershed Needs and Capabilities.....	57
B. Establish a Baseline	59
C. Classify and Rank Subwatersheds	78
D. Evaluate Local Watershed Programs and Regulations	82
E. Develop Project Concept Designs.....	85
F. Rate and Rank Individual Projects	86
G. Estimate Pollutant Loads and Reductions	89
Chapter 5: Field Assessment Methods.....	99
A. Conduct Stream Corridor Assessments	99
B. Conduct Upland Assessments	102

C. Conduct Project Investigations	103
D. Plan for Indicator Monitoring.....	109
 Chapter 6: Stakeholder Involvement Methods	113
A. Recruit Stakeholders	113
B. Educate Stakeholders.....	114
C. Refine Local Vision, Goals and Objectives.....	117
D. Manage Stakeholder Meetings.....	118
E. Hold Neighborhood Consultation Meetings.....	120
F. Solicit External Plan Review	121
 Chapter 7. Management Methods.....	123
A. Finalize Watershed Goals, Objectives and Indicators	123
B. Identify Priority Subwatersheds.....	124
C. Compile an Inventory of Potential Projects	125
D. Draft the Watershed Plan	126
E. Adopt the Final Plan.....	129
F. A Concluding Note on Implementation	133
 References	135

List of Tables

Table 1.1: Benefits of Watershed Planning	2
Table 1.2: Geographic Scales of Watershed Planning	4
Table 1.3: Using the Subwatershed Scale in Watershed Planning.....	5
Table 1.4: Protection and Restoration Projects	7
Table 1.5: Watershed Planning Steps and Corresponding Methods and Principles.....	9
Table 1.6: Differences Between Restoration and Protection Oriented Watershed Plans	11
Table 1.7: Essential User's Guide Methods.....	12
Table 1.8: User's Guide Downloadable Tools	17
Table 2.1: Watershed Planning Drivers and Additional Watershed Planning Resources.....	19
Table 2.2: Maryland Watershed Scales	20
Table 2.3: Matrix of Watershed Planning Drivers.....	25
Table 2.4: Major C2K Commitments Related to Local Watershed Planning	26
Table 2.5: Maryland MS4 Phase I Communities	30
Table 2.6: Maryland Phase II Communities	32
Table 2.7: Matrix of Additional Resources for Watershed Planning.....	35
Table 3.1: Tips for Utilizing a Consultant	46
Table 3.2: Useful Mapping Data for Watershed Planning	47
Table 3.3: Example Watershed Planning Goals.....	52
Table 3.4: Rules of Thumb on Budgeting and Estimating Costs.....	53
Table 4.1: Calculating Current IC Using ICCs for MDP Land Use Categories.....	64
Table 4.2: Estimating Future Impervious Cover for Undeveloped Land.....	66
Table 4.3: Important Monitoring Data in Maryland	69
Table 4.4: Maryland DNR GIS Data for Use in Sensitive Areas Inventory.....	72
Table 4.5: Forest Cover Coefficients for Maryland.....	75

Table 4.6: Potential Protection and Restoration Sites within a Sensitive Areas Analysis	77
Table 4.7: Examples of Metrics Used to Classify and Rank Subwatersheds	79
Table 4.8: The Eight Tools of Watershed Protection.....	82
Table 4.9: Potential Regulatory and Programmatic Change Recommendations	83
Table 4.10: Suggested Ranking Factors for Protection and Restoration Projects	87
Table 4.11: Example Project Ranking System.....	88
Table 4.12: Using the Simple Method to Estimate Pollutant Loads.....	90
Table 4.13: Primary and Secondary Pollutant Sources Considered by the WTM	91
Table 4.14: Maryland EMCs for Selected Stormwater Pollutants.....	91
Table 4.15: Estimated Average Annual Loading Rates for Watershed Model Segment 330.....	92
Table 4.16: Protection and Restoration Projects Evaluated by WTM	93
Table 4.17a: Pollutant Reduction Efficiencies and Reporting Units for Urban BMPs.....	94
Table 4.17b: Pollutant Reduction Efficiencies and Reporting Units for Rural BMPs.....	95
Table 5.1: Comparison of In-Stream Habitat Assessment Methods	100
Table 5.2: Comparison of Continuous Stream Walk Assessment Methods.....	101
Table 5.3: How the USSR Helps in Watershed Planning.....	102
Table 5.4: Summary of the Project Investigations.....	104
Table 5.5: Examples of Sentinel Indicators to Measure Progress Toward Goals	110
Table 6.1: Summary of Techniques to Reach Out to Stakeholders	115
Table 6.2: Differences Between Watershed Goals, Objectives and Indicators.....	117
Table 7.1: Example Recommendations Included in a Watershed Plan.....	127
Table 7.2: Example of an Implementation Planning Table	128
Table 7.3: Typical Table of Contents for a Watershed Plan	129

List of Figures

Figure 1.1: Howard County, MD Watersheds and Subwatersheds.....	3
Figure 1.2: The Watershed Planning Process.....	8
Figure 2.1: Maryland's Major Sub-Basins	21
Figure 2.2: Youghiogheny Sub-Basin	22
Figure 2.3: Brandywine-Christina Sub-Basin.....	23
Figure 2.4: Maryland Coastal Bays CCMP Area	23
Figure 2.5: Maryland MS4 Phase I and MS4 Phase II Communities	31
Figure 3.1: Subwatershed Origin Considerations	50
Figure 3.2: Connect Breakpoints Starting at the Origin	51
Figure 3.3: Breakdown of Watershed Planning Funding	54
Figure 4.1: Land Use Data as Depicted by Satellite Imagery vs. the MDP Land Use Layer	59
Figure 4.2: Representation of the Impervious Cover Model.....	62
Figure 4.3: Developed Land in a Subwatershed of the Lower Monocacy Watershed.....	65
Figure 4.4: Subwatershed Classifications Based on Current and Future Impervious Cover	68
Figure 4.5: Potential Protection Sites Identified for Further Evaluation in the Field.....	77
Figure 4.6: Subwatersheds Classified Using ICM Compared to an Expanded Classification.....	78
Figure 4.7: Example of a Project Concept Design for a Pond Retrofit.....	86
Figure 5.1: Reach Habitat Quality in Asylum Run Subwatershed, PA	100
Figure 5.2: Location of Impacted Buffers and Potential Reforestation Sites	101
Figure 5.3: Restoration Potential of Pervious Areas in Subwatershed of Watershed 263.....	103
Figure 5.4: Retrofit Inventory Map and One Retrofit Example in Weems Creek Watershed.....	104

Figure 5.5: Sensitive Areas Assessment for Powhatan Creek Watershed, VA.....	108
Figure 7.1: Restoration Projects in Paxton Creek North Subwatershed, PA	126

List of Acronyms and Abbreviations

AWMS:	Animal Waste Management System
B-IBI:	Benthic Index of Biological Integrity
BMP:	Best Management Practice
C2K:	Chesapeake 2000 Bay Agreement
CBP:	Chesapeake Bay Program
CCMP:	(Coastal Bays) Comprehensive Conservation Management Plan
COMAR:	Code of Maryland Regulations
CWP:	Center for Watershed Protection
DPI:	Discharge Prevention Investigation
EMC:	Event Mean Concentration
EPA:	Environmental Protection Agency
ESC:	Erosion and Sediment Control
FCP:	Forest Conservation Plan
FEMA:	Federal Emergency Management Agency
F-IBI:	Fish Index of Biological Integrity
FIC:	Future Impervious Cover
FIDS:	Forest Interior Dwelling Species
FSD:	Forest Stand Delineation
GIS:	Geographic Information System
IC:	Impervious Cover
ICC:	Impervious Cover Coefficient
ICM:	Impervious Cover Model
IDA:	Intensely Developed Areas
IDDE:	Illicit Discharge Detection and Elimination
LDA:	Limited Development Areas
MBSS:	Maryland Biological Stream Survey
MD DNR:	Maryland Department of Natural Resources
MDA:	Maryland Department of Agriculture
MDE:	Maryland Department of the Environment
MDP:	Maryland Department of Planning
MOA:	Municipal Operations Analysis
MOU:	Memorandum of Understanding
MOS:	Margin of Safety
MS4:	Municipal Separate Storm Sewer System
NCA:	Needs and Capabilities Assessment
NPDES:	National Pollutant Discharge Elimination System
NPS:	Nonpoint Source
PCB:	Polychlorinated Biphenyls
PFA:	Priority Funding Area

RBP:	Rapid Bioassessment Protocol
RCA:	Resource Conservation Areas
RRI:	Retrofit Reconnaissance Inventory
RSAT:	Rapid Stream Assessment Technique
RTE:	Rare, Threatened and Endangered (Species)
SAV:	Submerged Aquatic Vegetation
SCA:	Stream Corridor Assessment
SRI:	Stream Repair Inventory
SSPRA:	Sensitive Species Project Review Area
STORET:	STORage and RETrival
SVAP:	Stream Visual Assessment Protocol
SWA:	Source Water Assessment
TDR:	Transfer of Development Rights
TMDL:	Total Maximum Daily Load
URSA:	Urban Reforestation Site Assessment
USA:	Unified Stream Assessment
USDA:	United States Department of Agriculture
USGS:	United States Geological Survey
USSR:	Unified Subwatershed and Site Reconnaissance
WTM:	Watershed Treatment Model
YOY:	Young of the Year

A User's Guide to Watershed Planning in Maryland
